Goleta, CA 93117 | (530) 902 -1921 | jaredumphress@ucsb.edu

Education

University of California, Santa Barbara

June 2027

Bachelor of Science (B.S.), Environmental Studies

Relevant Coursework: Habitat Restoration Skills, Writing for Environmental Professionals

GPA: 3.85

Skills

Data Analysis in R, GIS, Microsoft Office, Public speaking, Spanish fluency

Environmental Management Experience

Assistant Farm Manager, Ellwood Canyon Ranch, Goleta

August 2024-Present

- Leading a [project](#) that works to distribute crates of excess citrus to food banks and students, providing organic produce to people who need it
- Managing three acres of land with a team of English and Spanish speaking workers to grow food in a regenerative manner that reduces synthetic fertilizers and pesticides
- Fostering a strong team of interns through interviews, and teaching farming techniques and concepts to new interns

Independent Researcher, [UCEAP: Tropical Biology and Conservation](#)

October 2025 -December 2025

- Independently [researched](#) the impact of interrow plant diversity on insect abundance and diversity on two different farms in Costa Rica
- Utilized Spanish skills to speak with a farm manager to understand the conditions of each farm
- Performed a literature review to contextualize the project and performed t-tests, diversity indices, and complimentary analysis in R Studio

Mentee, [Bren Environmental Leadership Fellowship](#)

Using Remote Sensing to Inform Rotational Grazing Practices

July 2025 - September 2025

- Assisted in developing an [R Studio Shiny App](#) that displays satellite data of an [1000 acre ranch](#)
- Tested various geospatial projections and compared analytical and visual differences between them
- Designed application aesthetics and created a user guide and explanation of how the data and models work

Intern, [Equitable Agriculture and Environmental Management Program](#),

UC Santa Barbara and University of Arizona

August 2024 - January 2025

- Conducted [research project](#) on the effect of environmental hazards on low birth weights in collaboration with a group, utilizing research to help environmentally disadvantaged communities
- Communicated results from data analysis in R, and GIS through a Canva presentation
- Gained knowledge in contemporary agriculture policies and challenges and discussed potential solutions with peers
